PROFESSIONAL SUMMARY

MSc Data Science graduate (2026) with hands-on SQL, Python (Pandas), Excel and Tableau skills, built through a data analytics internship and three projects on job-market, commodity-price and retail-inventory data. Comfortable querying and cleaning data, finding patterns and presenting findings through dashboards and clear written insights, and documenting data limitations to keep conclusions accurate. Seeking entry-level Data Analyst and Business Analyst roles.

TECHNICAL SKILLS

Analysis & Programming: SQL, Python (Pandas, Matplotlib), Exploratory Data Analysis, Data Cleaning, Basic Statistics
Databases: MySQL, PostgreSQL, DuckDB
Visualisation & Reporting: Tableau, Microsoft Excel, Power BI (basic), Dashboards
Tools: Jupyter Notebook, Visual Studio Code, Git/GitHub

EXPERIENCE

Quality Analyst Intern (Contract), Instawork — May 2026 – Jul 2026

- Clipped and graded video data used to train robots, following defined evaluation guidelines.
- Applied quality criteria consistently across clips, with close attention to detail.

Data Analytics Intern, Tatvam Consulting — Jan 2026 – May 2026

- Organised and maintained data in Excel spreadsheets and used SQL for data-related tasks to support the team's analysis activities.
- Collected and compiled information on colleges through phone outreach, keeping records accurate and organised for the team and communicating professionally with external contacts.

PROJECTS

AI Hiring Intelligence: AI/ML Job Market Analysis — 2026
Tools: Python, SQL, DuckDB, Pandas, Matplotlib, Jupyter Notebook — github.com/Anishaalobo/AI-Hiring-Intelligence

- Analysed March–April 2026 job-posting data with SQL (DuckDB) and Python to study AI/ML demand, skill themes, experience requirements and hiring by company and metro area.
- Found that AI/ML roles made up roughly 11–12% of postings and that skill themes differed between AI/LLM and traditional ML roles.
- Documented methodology and data limitations in the README to keep conclusions accurate.

India Cost of Living Tracker 2025–2026 — 2026
Tools: Tableau Public, CSV, Exploratory Data Analysis — github.com/Anishaalobo/India_Cost_of_Living_Tracker_2025_2026

- Built an interactive Tableau dashboard from a cleaned Government of India (Department of Consumer Affairs) commodity-price dataset, comparing current retail prices with six-month and annual changes.
- Highlighted the top 10 commodities by current price and by annual increase, and noted data limits (price snapshot; absolute rupee changes rather than inflation rates).

Zepto Inventory SQL Data Analysis — Dec 2025
Tools: MySQL, SQL, Excel, Visual Studio Code — github.com/Anishaalobo/zepto_SQL_data_analysis

- Wrote MySQL queries on a Zepto inventory dataset to analyse category mix, low-stock and out-of-stock items, discounts and product demand.
- Summarised findings to support inventory planning and restocking decisions.

EDUCATION

MSc Data Science, St Aloysius (Deemed to be University), AIMIT Centre, Mangaluru — Jul 2024 – May 2026
CGPA: 8.38/10 | **Coursework:** Machine Learning, Big Data Analytics, Data Visualization, Statistical Analysis, Data Mining, SQL

BSc Physics & Mathematics (Majors), Computer Science (Minor) — Oct 2021 – May 2024
St Aloysius College, Mangaluru | CGPA: 7.54/10

CERTIFICATIONS & JOB SIMULATIONS

Data Visualisation: Empowering Business with Effective Insights – Tata (Forage job simulation) — Oct 2026
Data Analytics Job Simulation – Deloitte (Forage job simulation) — Oct 2026
Infosys Springboard: Projects on Power BI (Oct 2026); Statistical Inference using R (Feb 2025); Analytics using Tableau (Feb 2025); Basics of Python (Feb 2025); Probability & Statistics using R (Nov 2024)
